

الحلم السعيد E-learning App

E-LEARNING PLATFORM ACADEMY

Introduction

Holom Said is an educational and intuitive e-learning platform built with Flutter and Supabase, offering a seamless experience for both administrators and users of the Holom Said Academy.

The platform features comprehensive course management, exams passing, user authentication, real-time messaging, and a robust admin dashboard for content management.

Admin Panel Features

1

Courses Management

Admins can add, edit, or delete courses using a course form that includes:
thumbnail, title, description, trainer, course program, and course URL

3

Users Management

Admins have access to users public information such as full name, date of birth, marital status, ..etc. collected from users when creating a new account

2

Events Management

Same as courses management, admins can add events announcements for new programs, courses, or live sessions
The event form includes:
Thumbnail, title, description, and date.

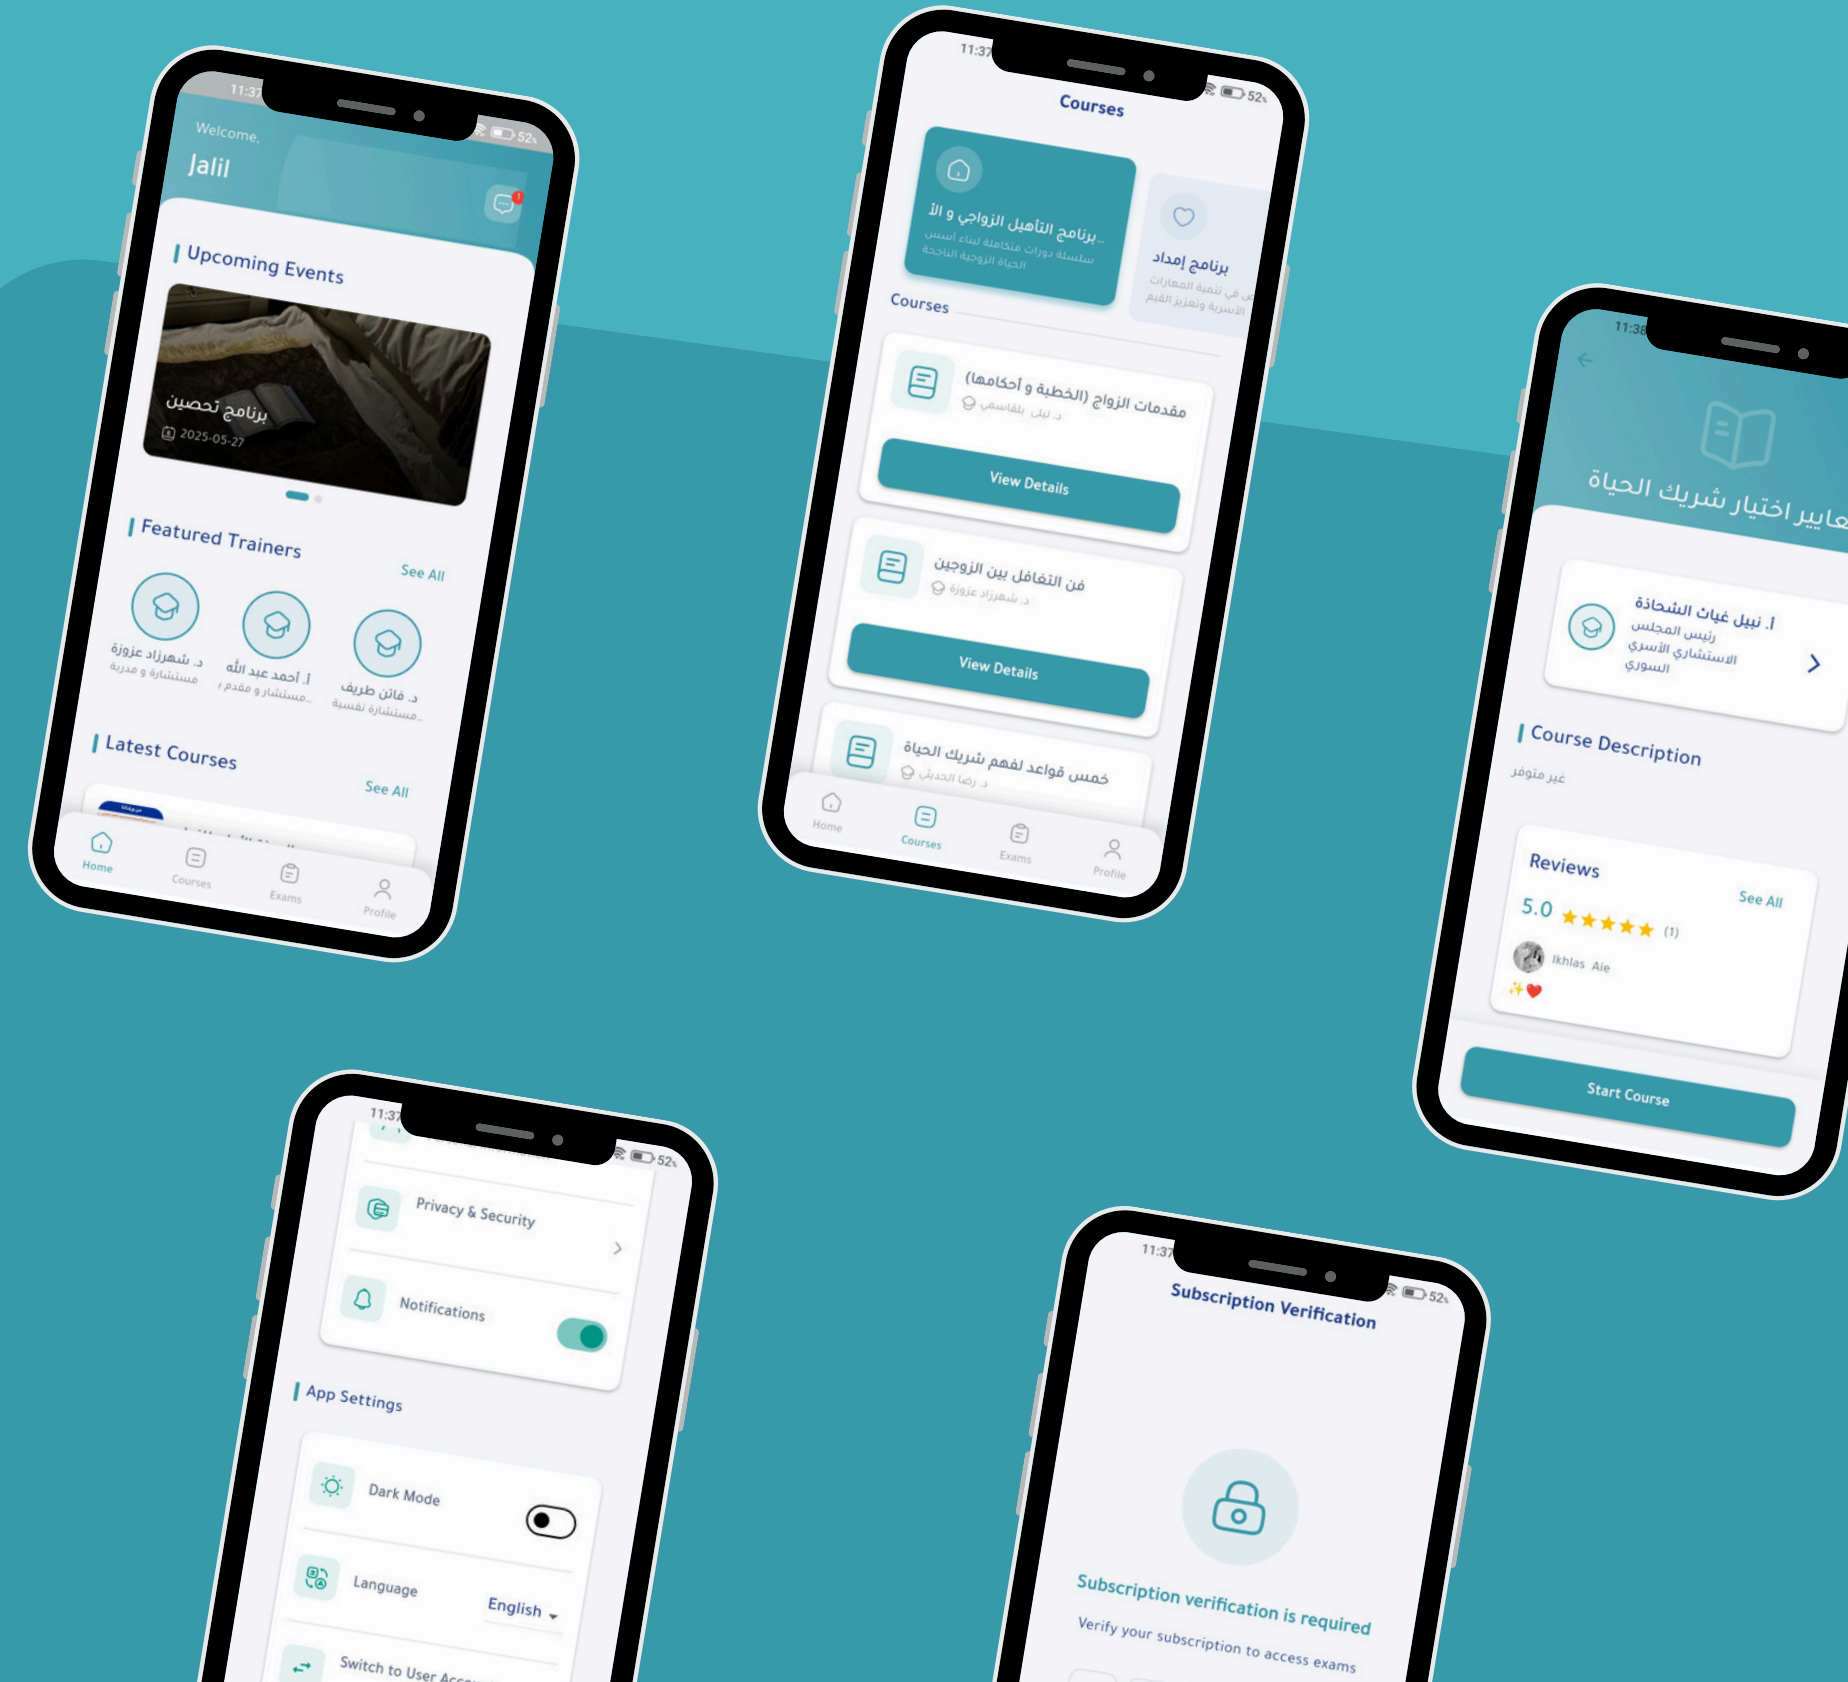

4

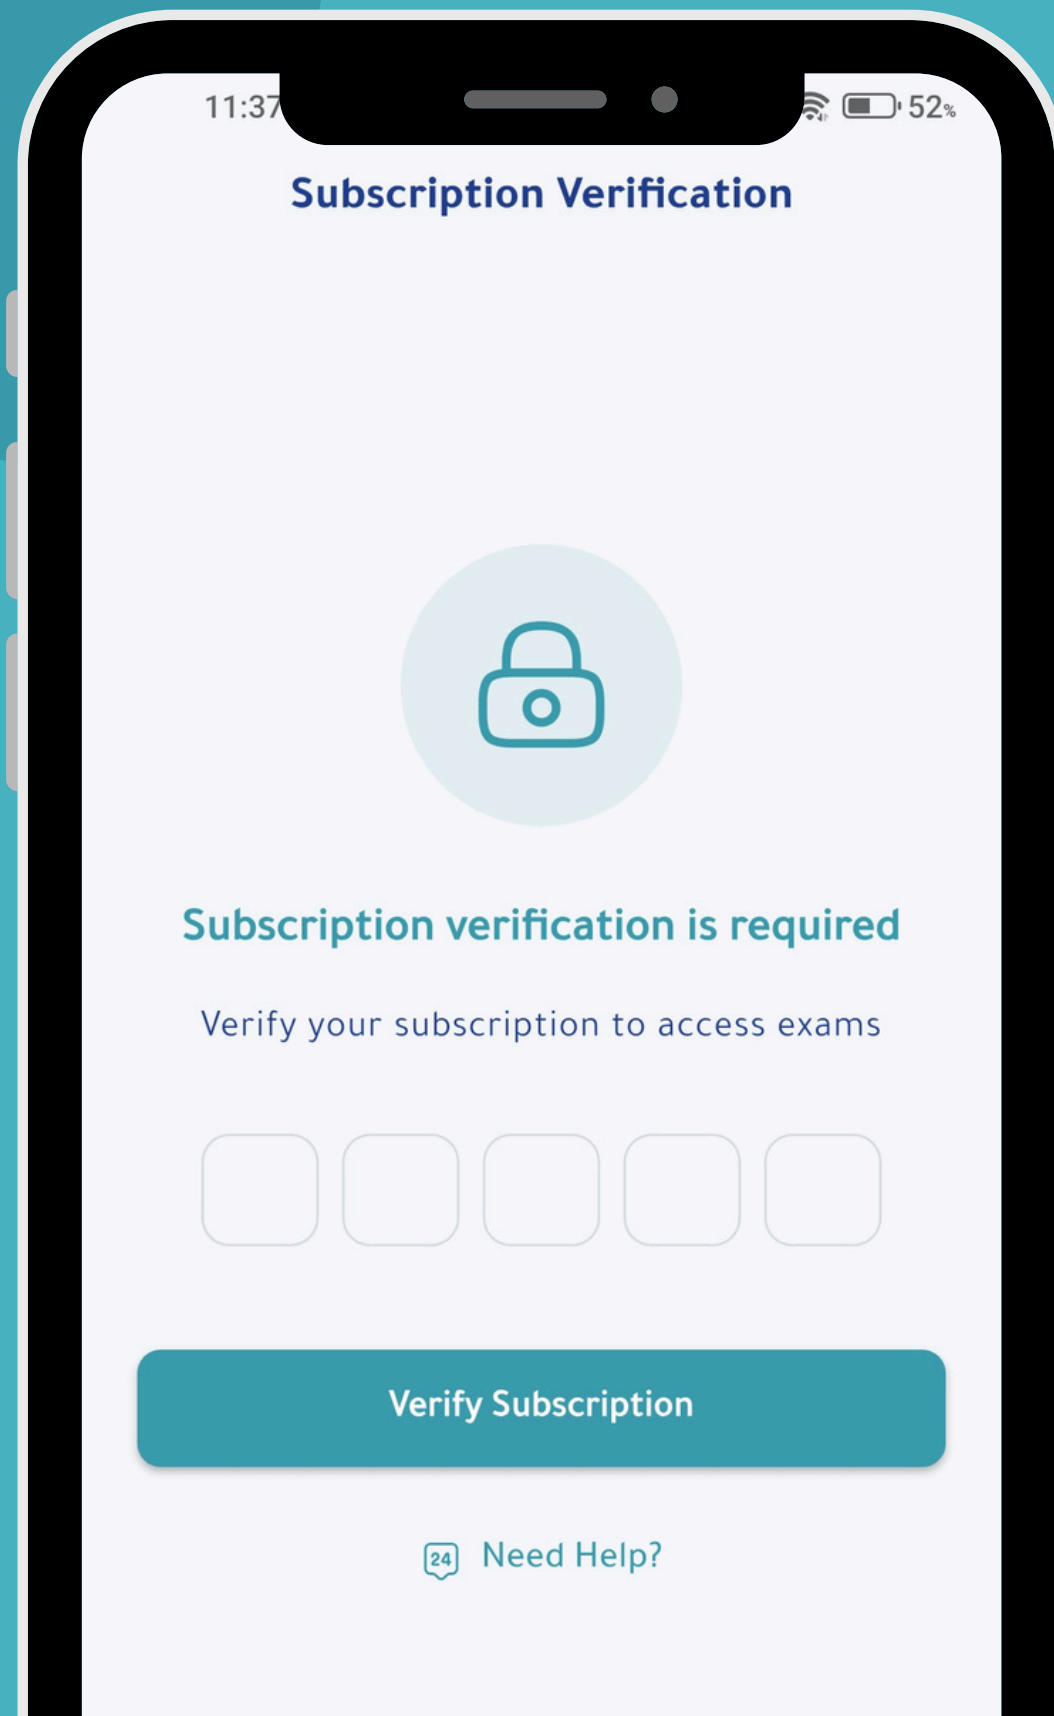

Exams Management

Admins can Add, edit, delete exams
Manage Exam parameters: Duration & Passing score
Add question of multiple choice options type

User Interface Overview

- **Dashboard:** Personalized welcome message with a messages icon; showcases latest events, featured trainers, and latest courses for quick access.
- **Courses Page:** Structured into three main programs, each containing a curated list of featured courses to guide user learning paths.
- **Exams Page:** Displays active and recently published exams, automatically sorted based on exam duration and publication time.
- **Profile Page:** Enables users to update name, change profile picture, modify password, and switch between dark/light themes and languages for a tailored user experience.

Courses & Exams Enrolment

- Subscription based access
- Verification code delivered by the academy team to eligible students
- Help option for reporting issues

Exams Feature Overview

Admin Controls

- Add, edit, delete exams
- Set exam parameters: Title, Description, Featured Course, Duration (hrs), Passing Score, Questions.
-
- Questions are single-answer multiple choice, created during exam setup.

User Experience

- Users see only published exams within valid duration.
- Each exam is accessible once per user.
- Immediate result upon completion, with score saved in Exam History.

Analytics & Monitoring

- Admins view all completed exams with user-specific scores.
-
- Access to overall stats: average score, number of attempts, and user performance metrics.

Profile Management

- **Edit, Update, and Delete**

Both admins and user has the option to update their fullname, profile picture, password, as well as the option to delete their accounts in a clear user-friendly way

- **Key difference**

The only difference is in 'Others' section, that is only available for users, and replaced with an 'Admin Preview' feature for admins

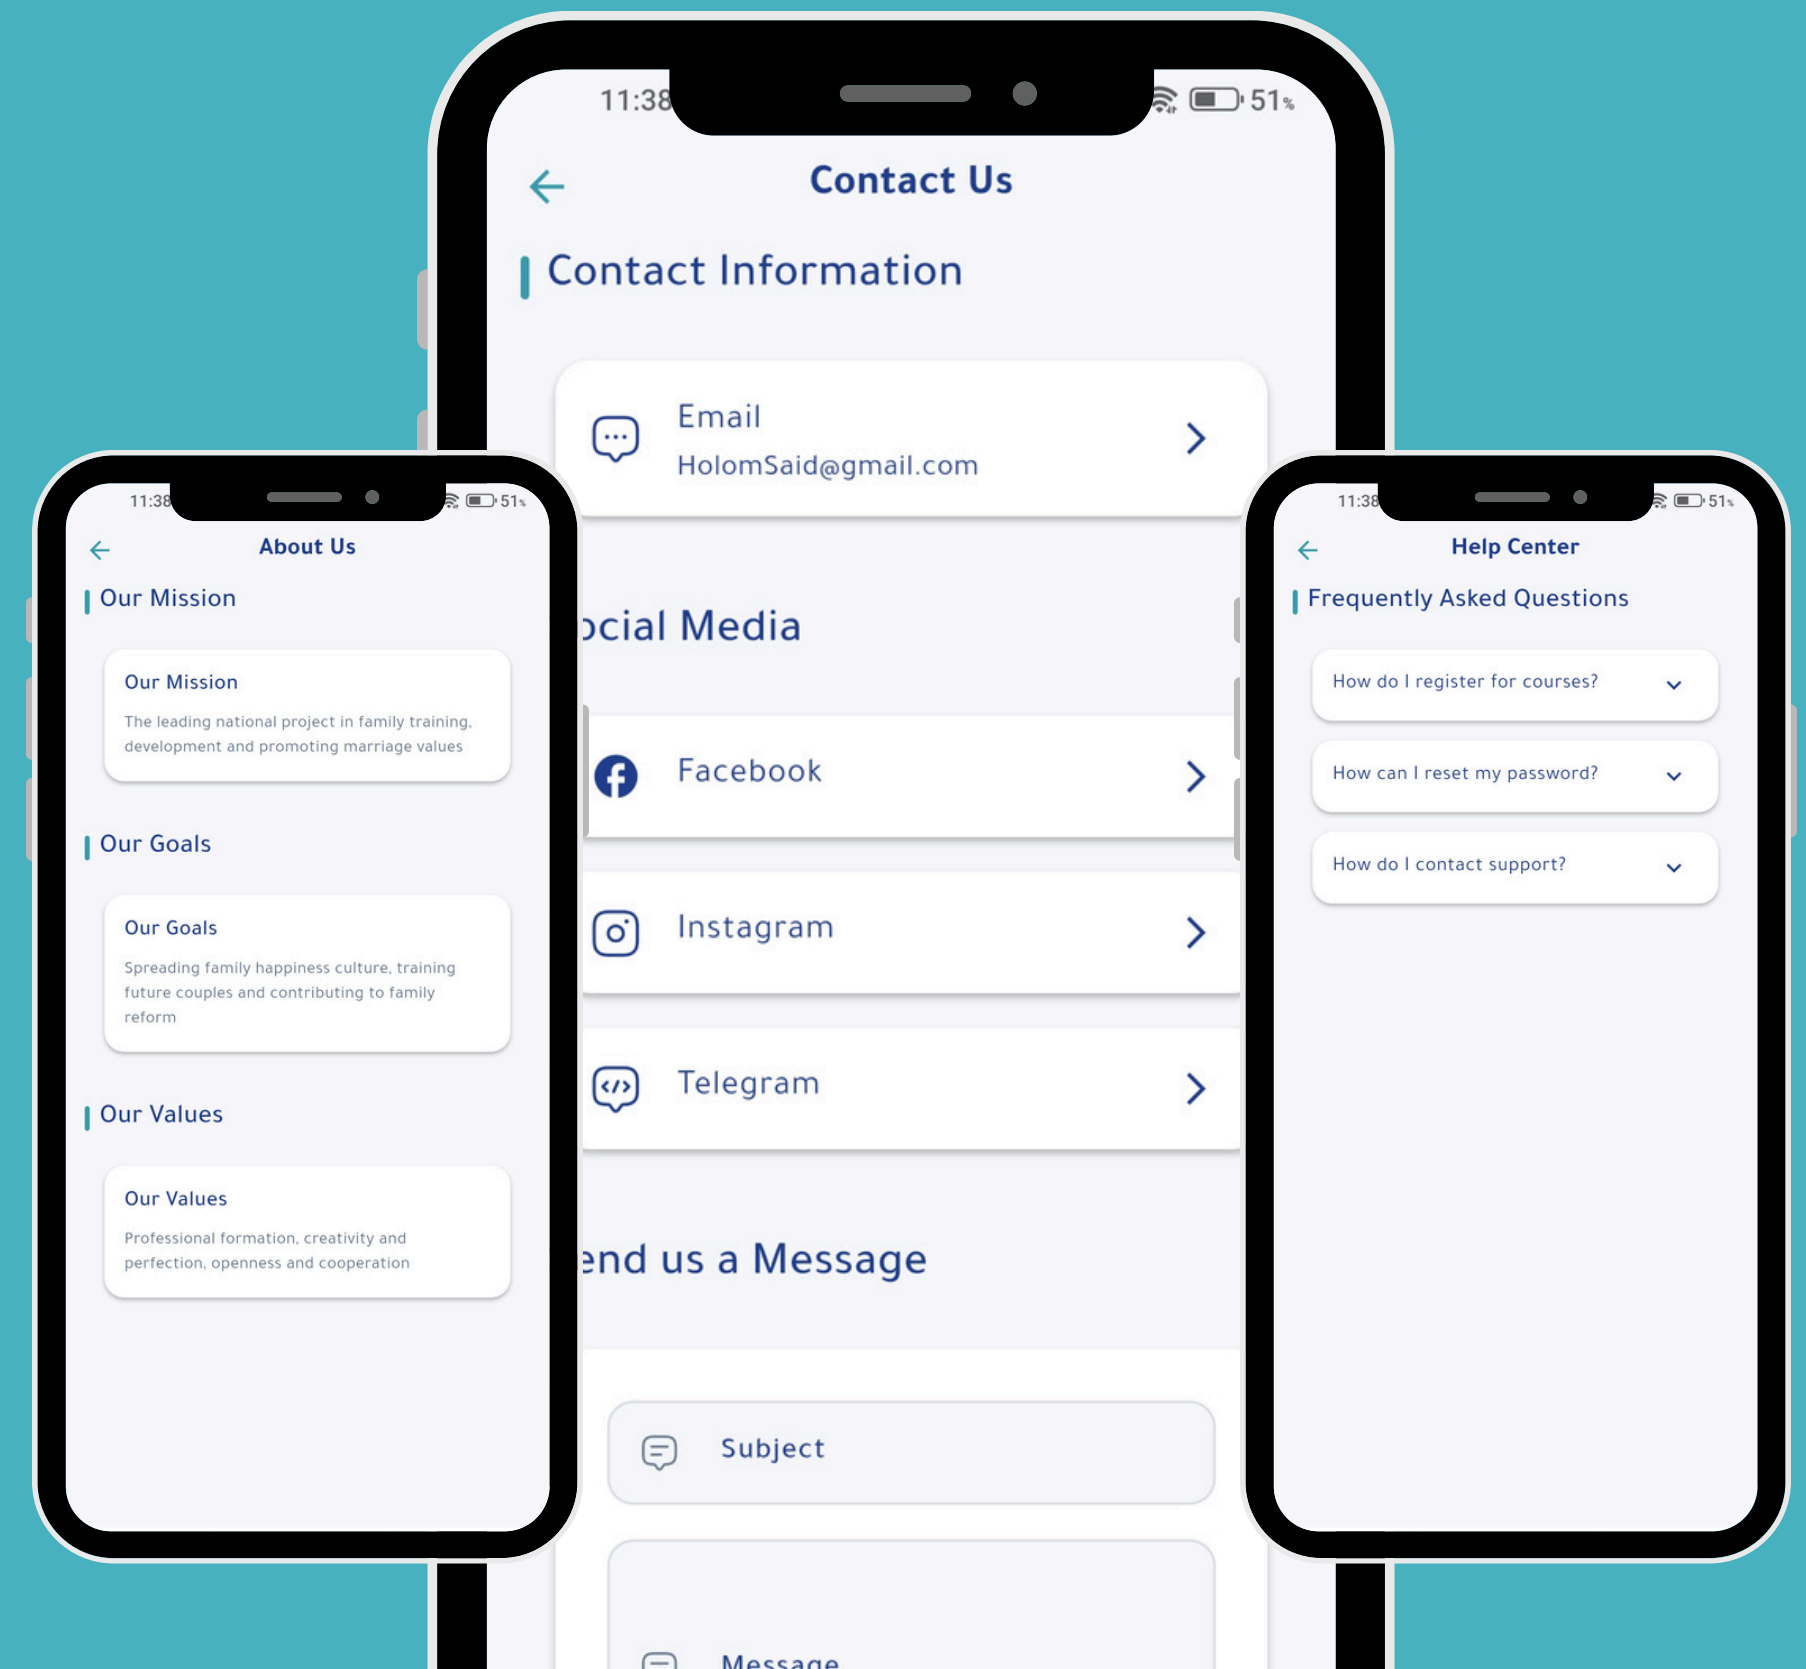

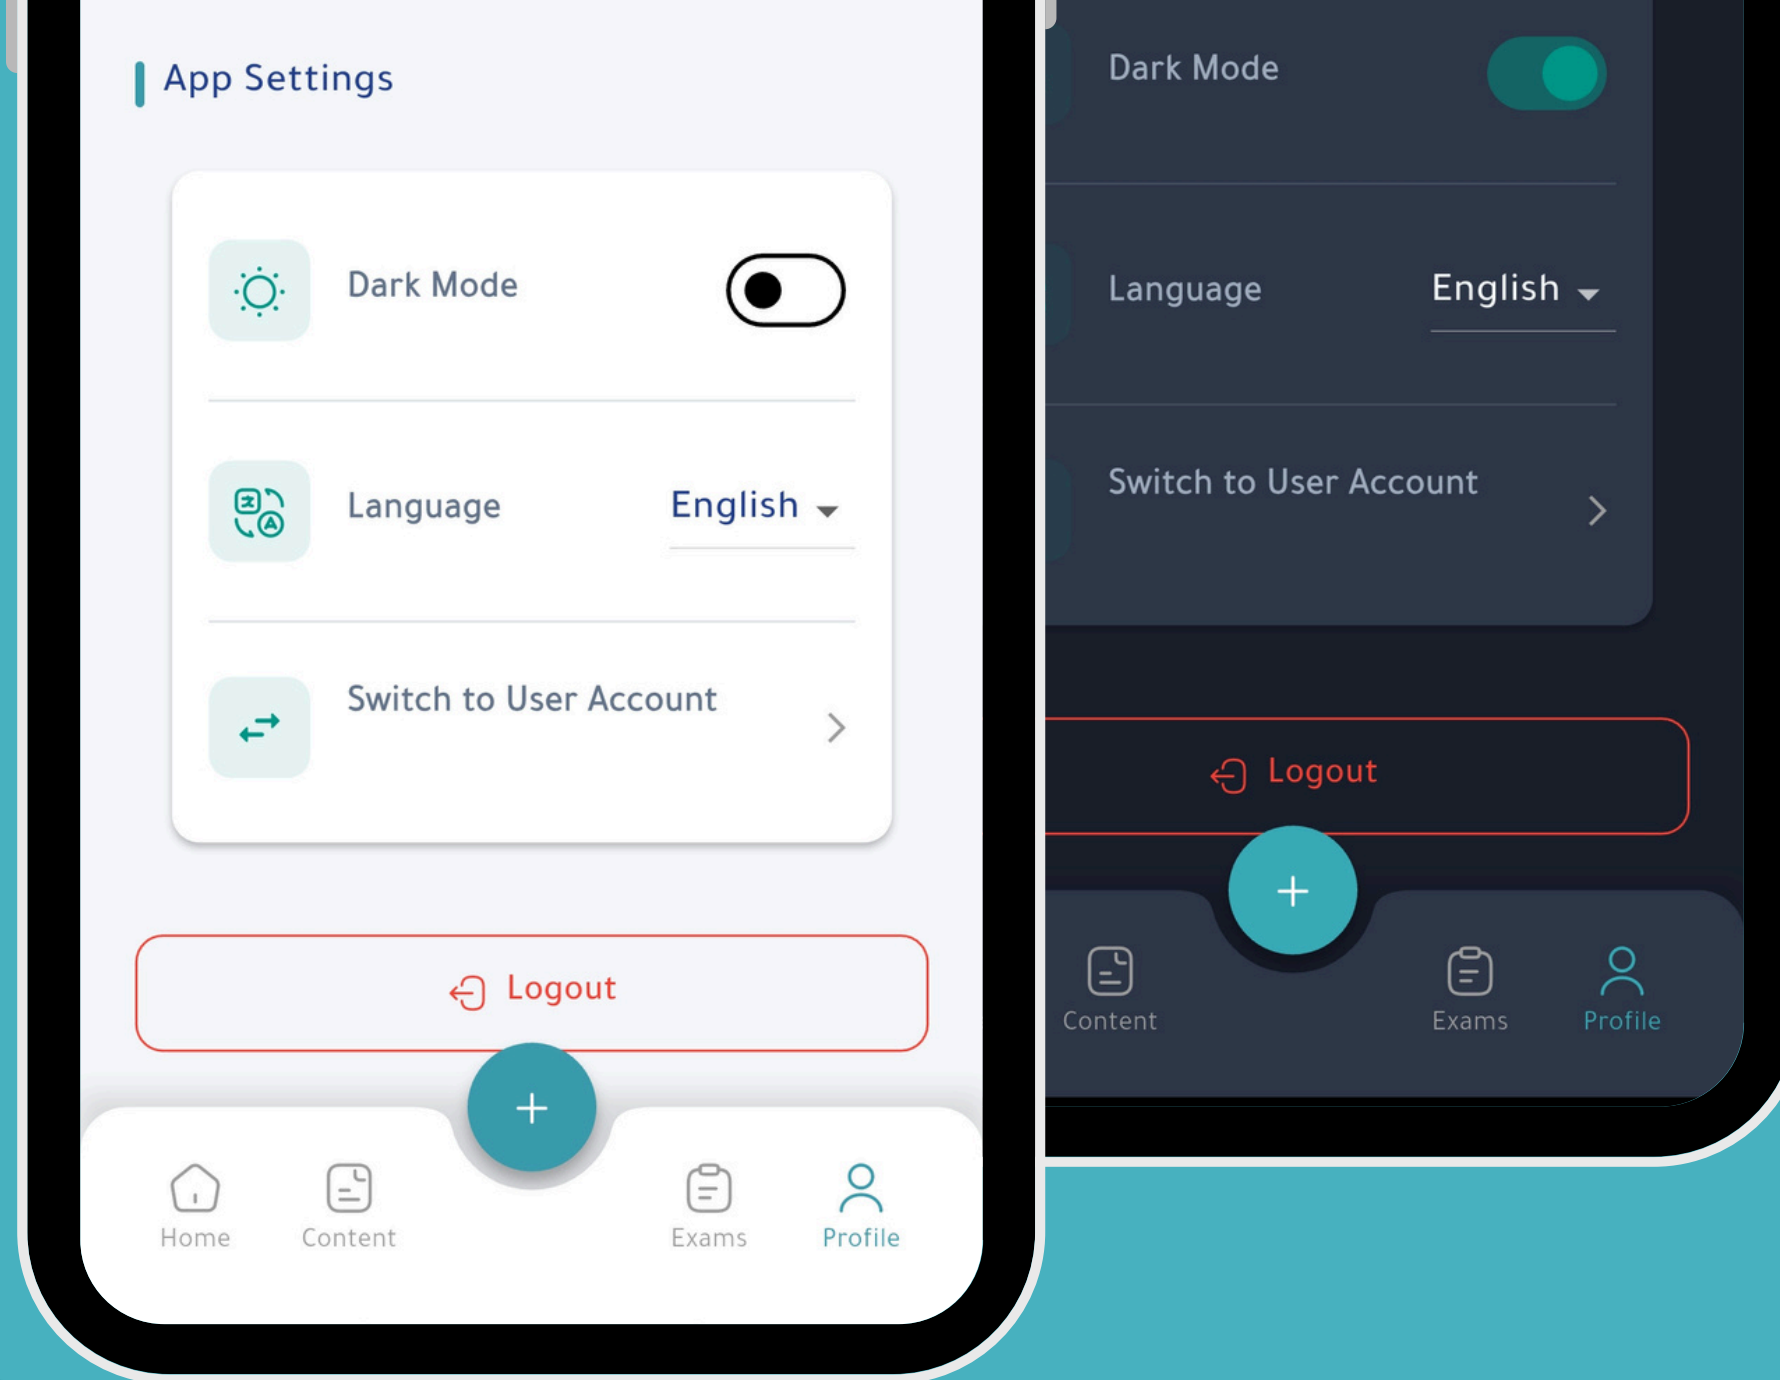

Others Section

1. About Us (Academy Description)

2. Frequently Asked Questions

3. Contact Details

App Settings Section

- **Dark Mode**

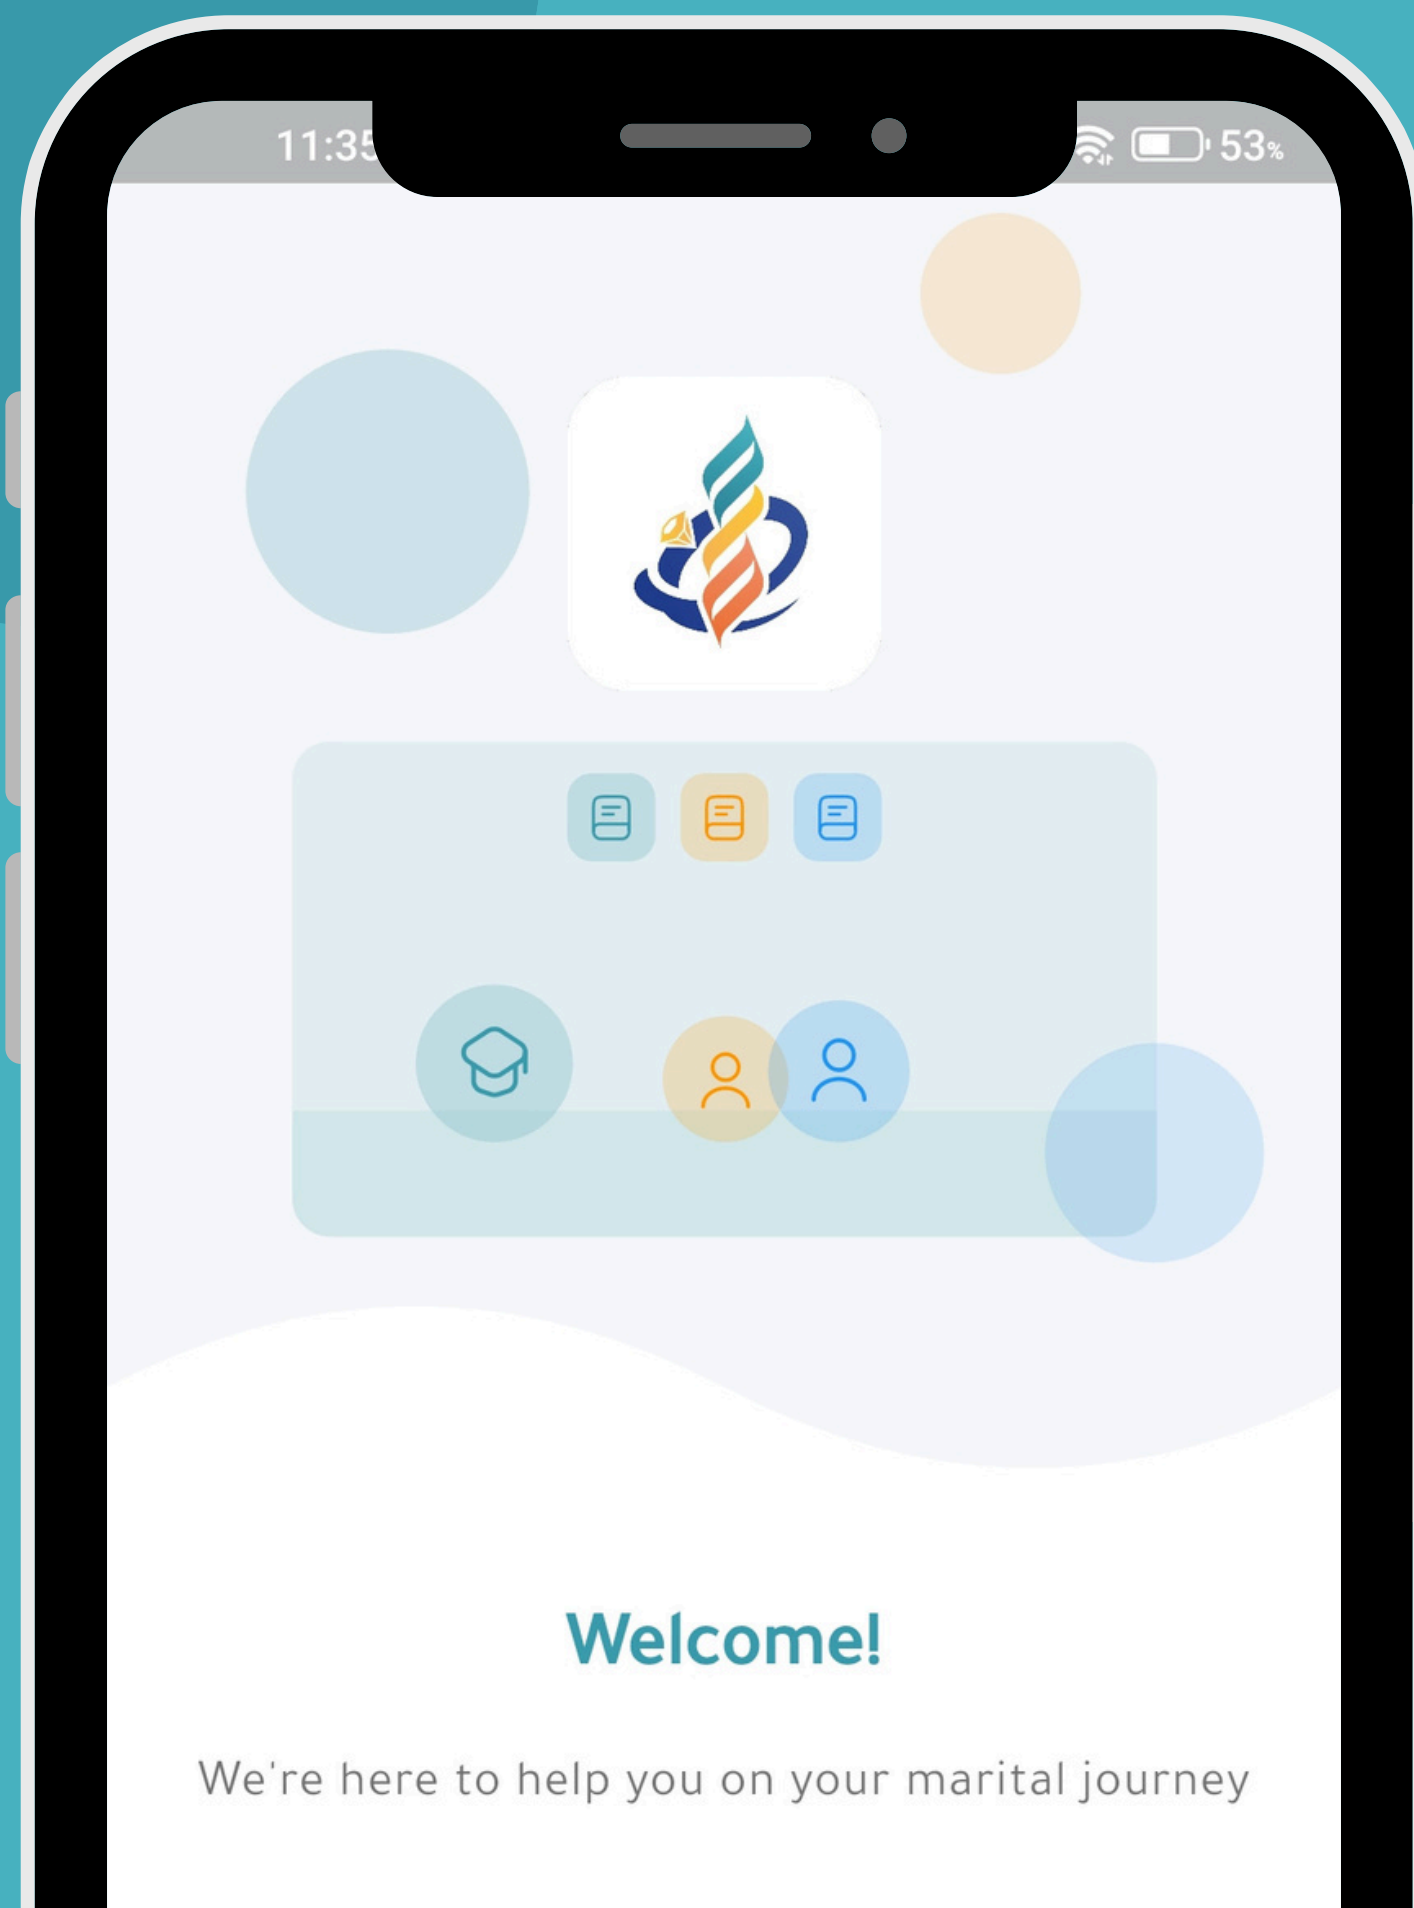

By default, the app follows the system mode, with an option to switch between dark and light mode as desired

- **Bilingual Support**

Bilingual support, (English & Arabic) allowing users to switch between languages without disrupting their experience.

- **Push Notifications**

real-time push notifications to keep users informed about new courses, upcoming exams, and important announcements.
